Description
Featuring 5 digits of rate and 8 digits of total, the 917-BATRAT-M is a battery powered indicator with flow rate alarm output. It is capable of accepting magnetic pickup, DC pulse and switch closure inputs from pulse producing flowmeters. The unit can be ordered with an optional 4-20mA output. When this option is used, it uses the 4-20mA loop to provide power when this output is used. The 917-BATRAT-M is available with an optional setup program (S1 Option). Alternately it is available with a RS485 Modbus RTU communications and a datalogger.

DATA STORAGE:
Setup Information: Stored in flash memory
Totalizer: Stored in battery backed RAM but can be saved to flash memory by operator for recall after battery change out.

COMMUNICATIONS OPTION (S1):
RS232 SERIAL SETUP SOFTWARE OPTION:
This option enables you to access a variety of process parameters through serial communications. PC compatible communications software is included with this option. With this software and a 917-BATRAT-M Serial Adapter Cable (BSAC1) you will be able to setup the 917-BATRAT-M through your PC.

RS-485 MODBUS and DATA LOGGER OPTION (S2):
The optional RS-485 card utilizes Modbus RTU protocol to access a variety of process parameters. The Data Logger stores the totalizer to flash memory once every 24 hours at the time you set. The data logger can hold 26 days of totals, on the 27th day the oldest total in the logger is dropped. Requires external DC power: 6-28VDC (input is reverse polarity protected)

Current Draw:
Receiving: 2 mA
Transmitting: 125 mA (instantaneous peak)
